

CroxX

## Uplus<sup>+</sup>

Solution for stabilization of Urea and UAN. CroxX Uplus<sup>+</sup> blocks the activity of the Urease enzyme and inhibits the conversion of Urea, reducing ammonia losses and providing more Nitrogen to the plant. Ammonia losses after surface application of Urea are inevitable if no Urease Inhibitor is used. Adding CroxX Uplus<sup>+</sup> significantly reduces the enzymatic conversion of Urea to ammonia for 2-3 weeks and leads to higher Nitrogen use efficiency.

**CE certified**

Uplus<sup>+</sup>

## Benefits

- ✓ Low-viscosity formulation
- ✓ Protects Nitrogen against ammonia volatilization losses
- ✓ Reduced losses make more N available for the plant
- ✓ Safe and easy handling
- ✓ Valid CE-Certification

**Packaging: 20l / 200l/ 1000l**
