

Croxx micro

Boron

Liquid Boron Fertilizer for Foliar Application and Fertigation in crops with high boron demand due to soil deficiency, specific growth stage or high boron need in general.

The sufficient supply of boron increases the fertility of the flowers and improves pollination in fruits, vineyards, potato, citrus, oilseed rape e.g.

For Foliar Application and Fertigation

Content (% w/w): 11.0 B

Bulk density (kg/l): 1.37 / **pH:** 7.7

Benefits

- ✓ Secures B-supply
- ✓ Increases fertility of flowers
- ✓ Maximizes fruit setting

Packing: 1 l / 5 l / 20 l / 1000 l
