

CroxX stim

Aquaboost

This innovative solution improves soil water absorption, by lowering surface tension and facilitating water penetration into the soil.

It reduces the losses by runoff and eliminates erosion, retaining nutrients and organic matter in the soil.

Through improved infiltration evaporation can be reduced, saving precious irrigation

Content (% w/w)

70 Nonionic surfactant / poloxamer

Bulk density (kg/l): 1.05 / pH: 5.0 - 8.0

Aquaboost

Benefits

- ✓ Optimized water infiltration, improved soil hydration
- ✓ Stimulates regreening of dry spots in hydrophobic soils
- ✓ Save on irrigation resources by more uniform water distribution

Packaging: 1000l
